**Abstract:** Our project is easy to use and our project is not only useful for the households it can be applicable in the coalmines where very harmful gases are present and where the health of the people is affected. But, if we place a gas leakage detector we have designed the health of the workers can be protected because the gas leakage detector is going to identify the harmful gases and thereby the health is saved not only saves the health of the people but also if we place a chimney where the major part of the harmful gases are evolved we can greatly reduce the pollutants also.
