

## **TITLE: Generation of Electricity By Heat**

### **Team Details:**

<b>Name</b>	<b>Hall Ticket No.</b>	<b>Title</b>	<b>Dept.</b>
G.Veera Nagesh	14K41A0230	Generation Of Electricity By Heat	EEE
A.Sravan Kumar	15K45A0201		
M.Arun Kumar	15K45A0212		
P.Rajesh	15K45A0214		
V.Chandrasena	15K45A0218		

**Community Partner:** The stake holder/customer of the product we designed is a village person who studied till 9thclass.—His name is Mr. J. Ranjith who is an auto driver, who doesn't earn a proper amount to lead his family and as we know the economic status of such people is very poor.

**Abstract:** The major concern about to this project is to generate an excess power for house hold purpose and if able to generate excess then we can use it for our country development. Thus, this project is useful for even the development of a country. Thus, the project is very useful for nation and as well as for a common man to raise his economic status by reducing the power bill. Thus, it can be a helpful for a common man and even for nation. Thus, such an innovative idea cannot be concluded in such a small conclusion and it can be extended in the coming future.
