Community Partner: Our community partner is Rajeshwar Reddy garuincharge of SR Engineering College canteen. His is the one who gave us permission to proceed to place the equipment in canteen.

Abstract: Air cooler objective is to provide cool air without any charge and should be affordable by everyone in the society even the poorest. Second objective is reusing the waste. The Water bottles in present days are thrown away which are mostly made of plastic, which is the major cause of pollution. So, we are using those bottles to convert the hot air into cool air, thus it becomes environment friendly.
