### **Abstract:**

Now a day's water scarcity is a big problem. We should save water as it is being wasted in every house. In order to save water and power we are making this project. Saving water and power for future is our mission; we have prepared a device which can be used to control the water flow. Water saving should be done in order for our own purpose in surviving; we are making a step in saving water. To preserve water and stop wastage of water.
