Abstract:

Most of the students are STEM phobic's and face difficulty in solving problems, so they wont choose this as a career option. Also keeping the campus clean and swatch is a big deal for the institutions. Here we are going to solve two issues with a single product. Our solution is digital based when students dump garbage/waste into the dustbin it will sense that and display a challenge related to STEM. When the student solves the challenge successfully, it will dispense the award.
